ADVANCED
CYBER SYSTEMS LAB

The Advanced Cyber Systems Lab (ACSL) at Gateway Community College provides hands-on learning opportunities for people to expand and enhance their skills in the technology sector.

The program is informed by the **ACETL** (Advanced Cyber Education & Technology Labs) initiative from **egx.org** with a focus on security best practices and research on: **hardened and security kernel OSes**, **correct by construction software and systems**, **language theoretic security**, and **formal methods**.

Explore current and emergent IT topics in a hands-on, real-world environment.

Work side by side with experienced industry professionals on impactful projects utilizing cutting edge technology and best practices.

Test new technologies and ideas in the lab to understand their strengths and limitations before deploying them in production.

Improve cybersecurity training and help build the high ground in defensive system design.

Engage in the tech and cybersecurity community, and network with professionals from the Phoenix Metro Area & greater Arizona.

We look forward to seeing you soon!

Located in Room **MA 2108**
GateWay Community College-Washington Campus
108 N 40th St, Phoenix, AZ 85034
